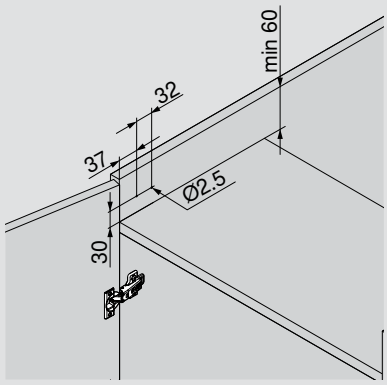
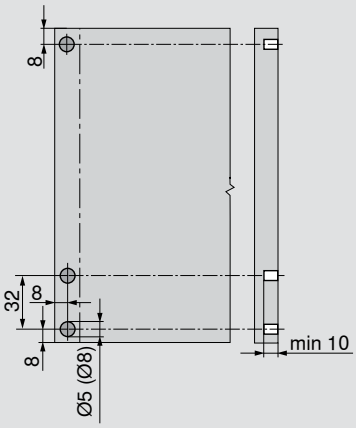
SERVO-DRIVE flex

Planung und Montage für Kühl- und Gefriergeräte

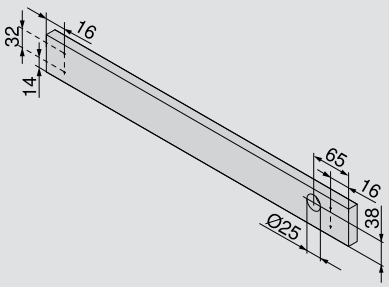
Vorbereitung / Bohrungen



Bohrung für Montageplatte

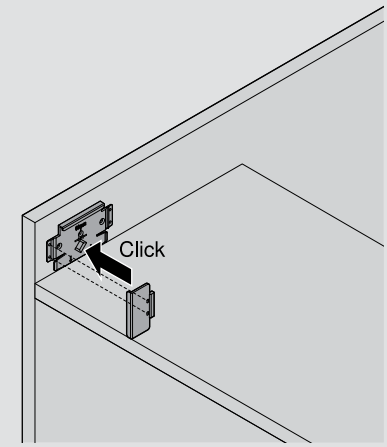


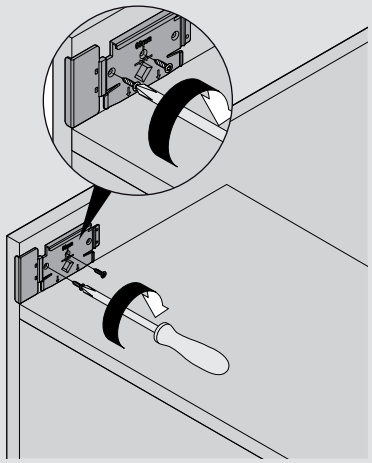
Bohrung Front für Puffer

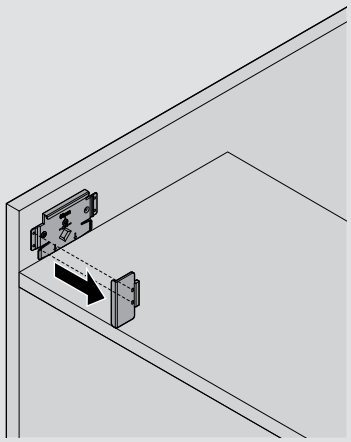


Bohrung Frontblende

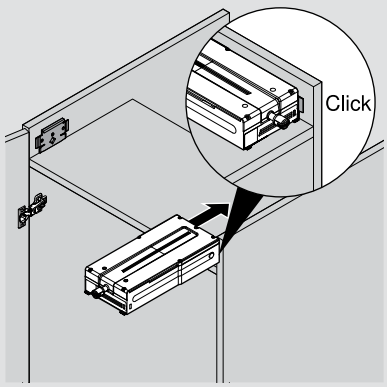
Montage mit Montagelehre

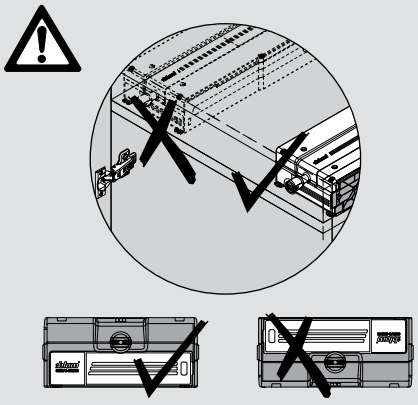






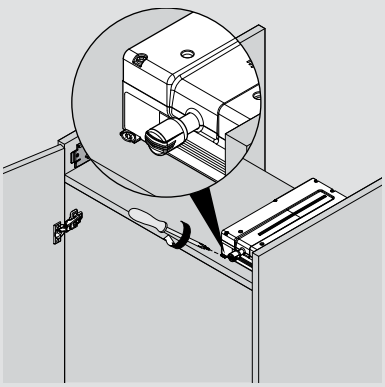
Montage Antriebseinheit





Wichtiger Hinweis!

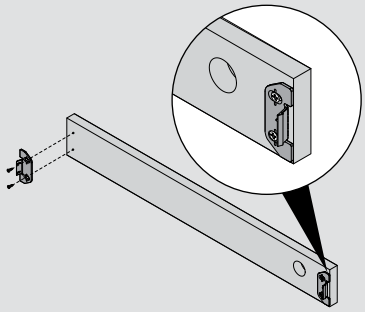
Transportsicherung

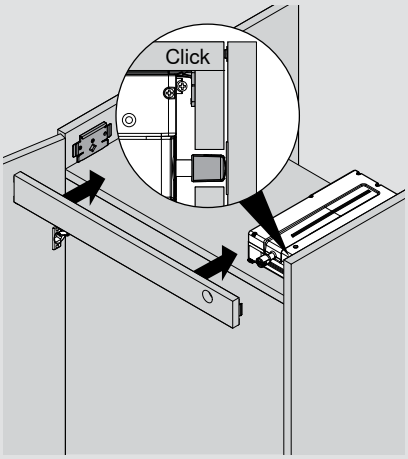


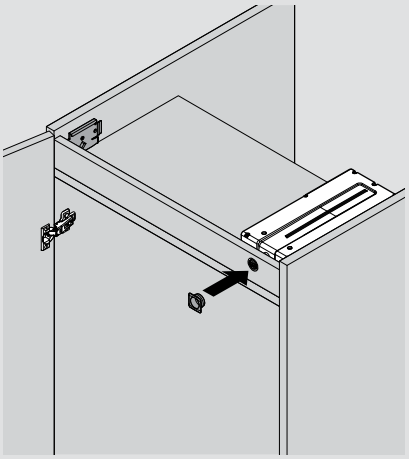
SERVO-DRIVE flex

Montage für Kühl- und Gefriergeräte

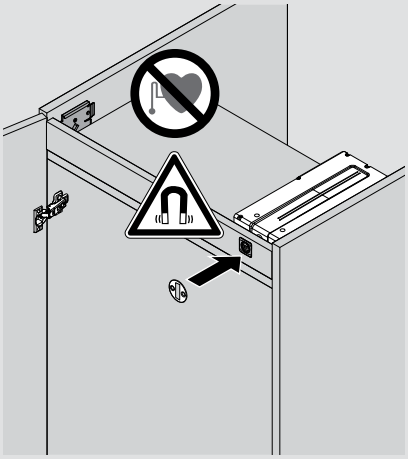
Montage Blende

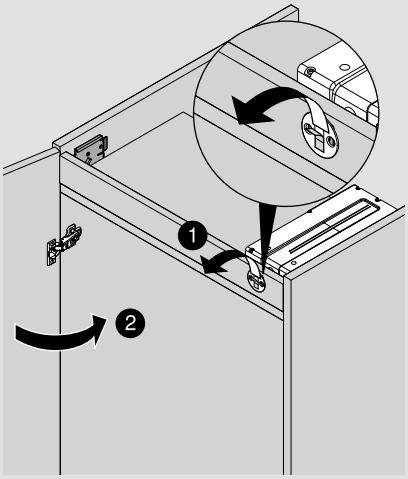


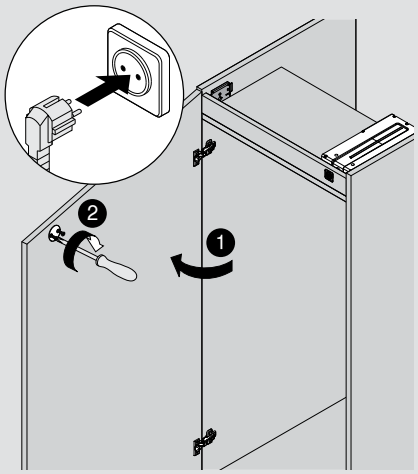




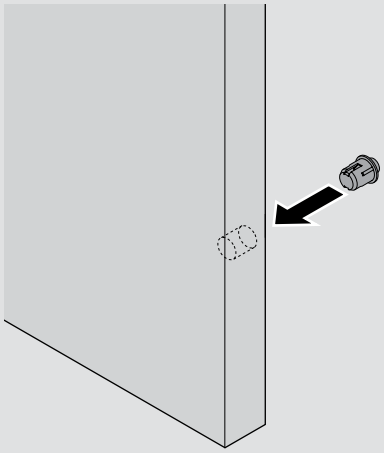
Montage Haftplatte



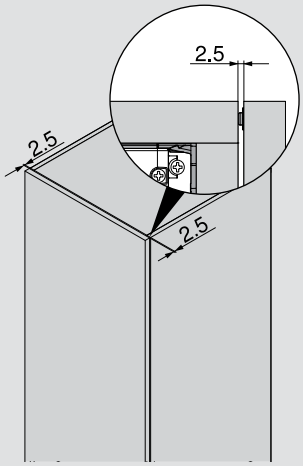




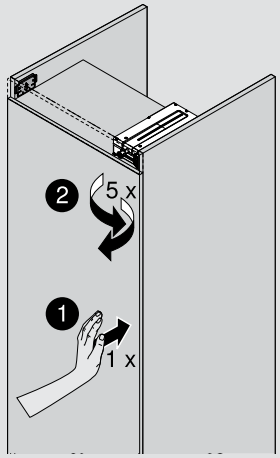
Puffer montieren



Frontspalt einstellen



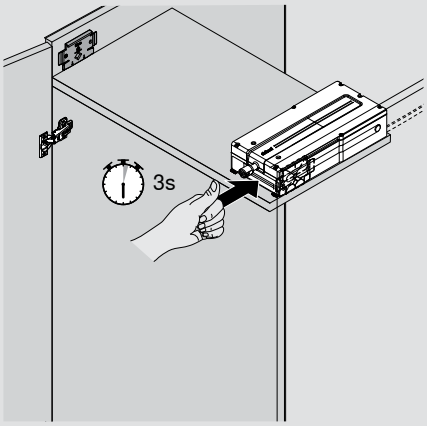
Referenzfahrt bei Inbetriebnahme

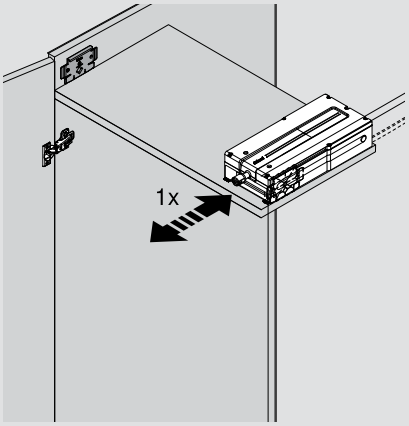


SERVO-DRIVE flex

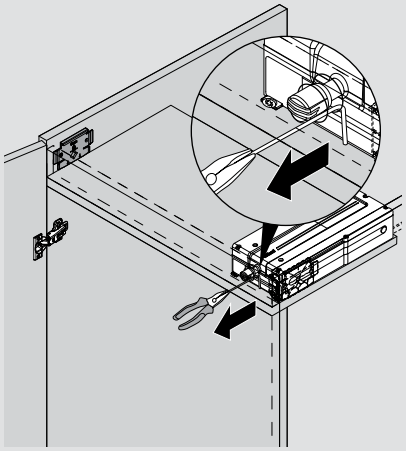
Demontage für Kühl- und Gefriergeräte

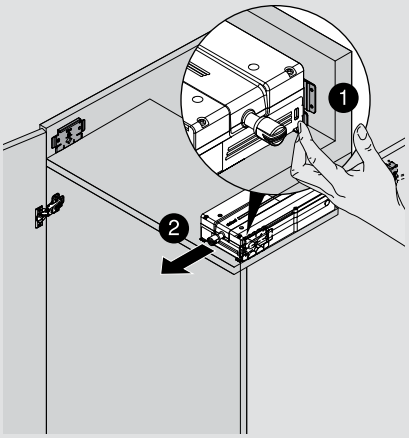
Reset SERVO-DRIVE Einheit





Demontage

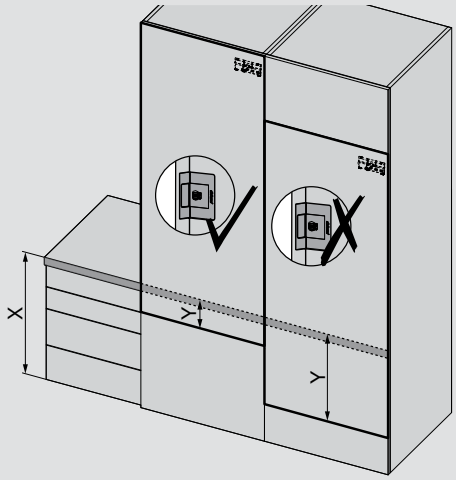


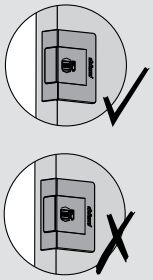


SERVO-DRIVE flex

Montage Funkschalter (optional)

Empfehlung Einsatz Funkschalter



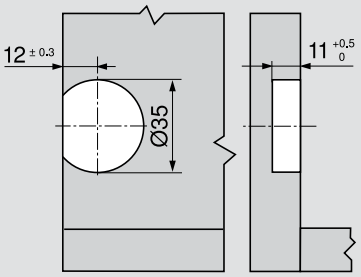


y ≤ 200 mm

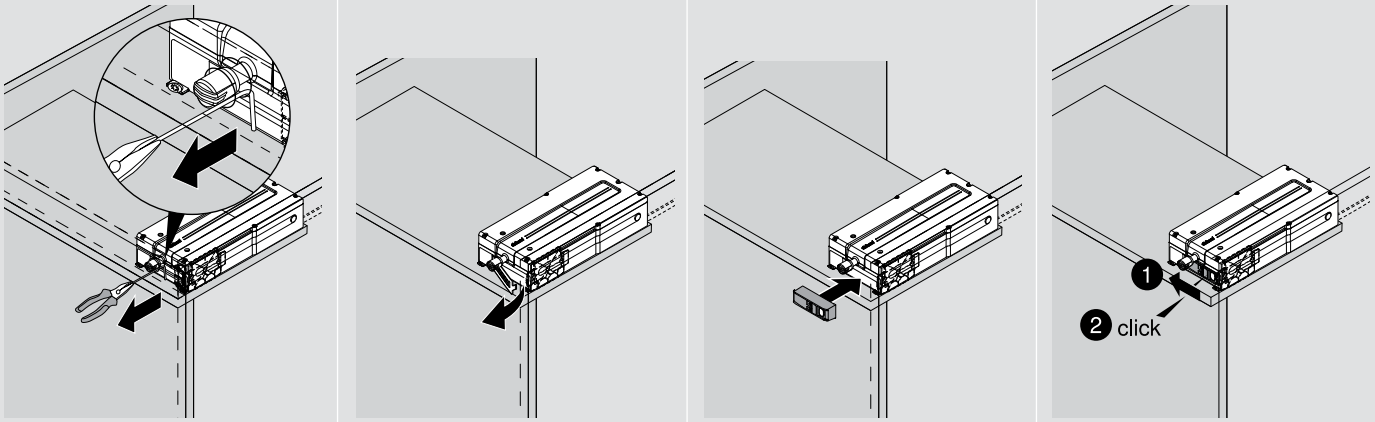
y > 200 mm

x = Arbeitsplattenhöhe

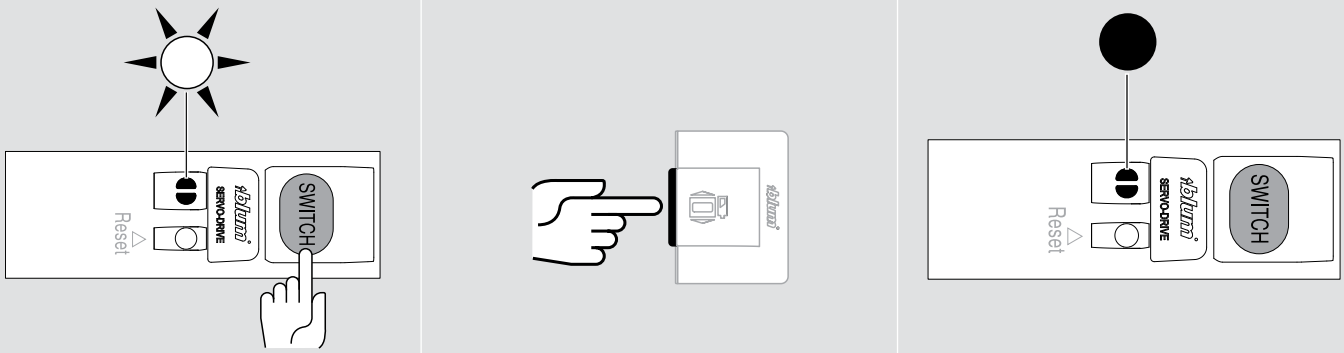
Montage Funkschalter



Montage Funkempfänger



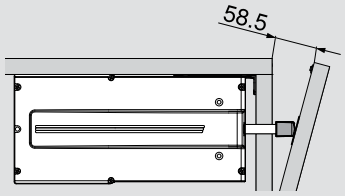
Aktivierung Funkschalter

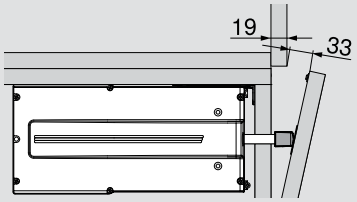


SERVO-DRIVE flex

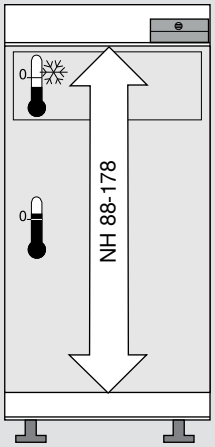
Einbauvarianten

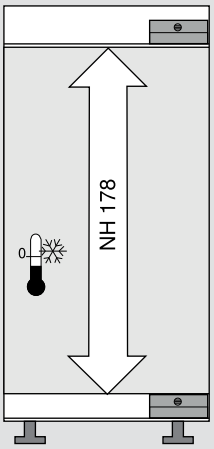
Zugriffsspalt - Maße

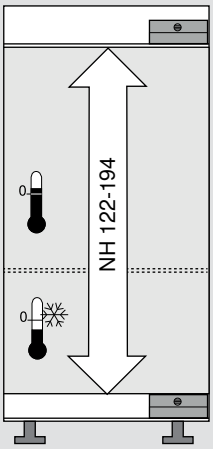




Einbausituationen (benötigte Anzahl SERVO-DRIVE flex Einheiten entsprechend der jeweiligen Anwendungssituation)







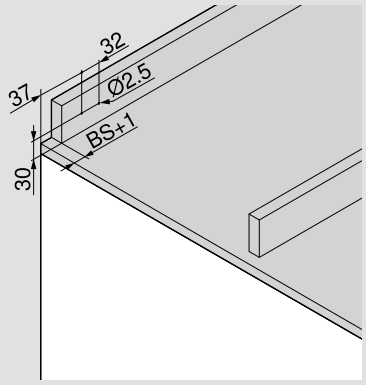
Allgemeiner Hinweis

Wenn die Gerätetüre für längere Zeit geöffnet ist, zum Beispiel aufgrund des Einräumens eines Einkaufes, kann sich im Inneren des Kühl- und Gefriergerätes nach dem Schließen ein Vakuum bilden. Die mögliche Folge: die Gerätetüre lässt sich für wenige Sekunden nicht öffnen. Dieses Vakuum baut sich normalerweise innerhalb kurzer Zeit ab und die Öffnungsfunktion ist wieder vollständig gegeben.

SERVO-DRIVE flex

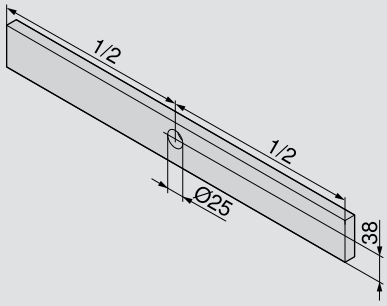
Planung und Montage Geschirrspüler

Vorbereitung / Bohrungen

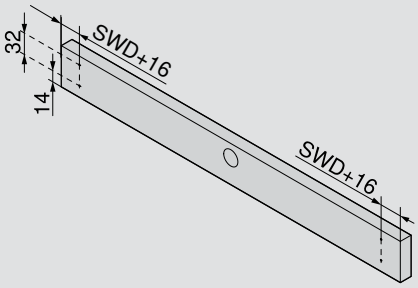


Bohrung für Montageplatte

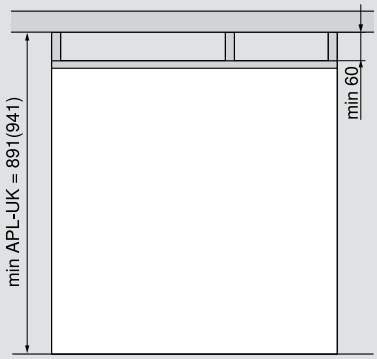
BS 16-19 mm

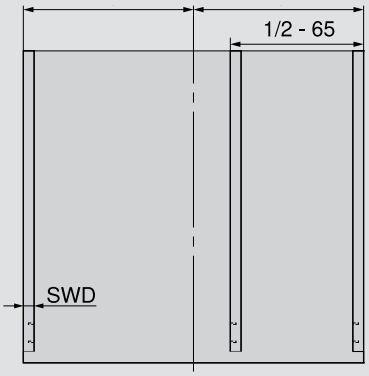


Bohrung Frontblende

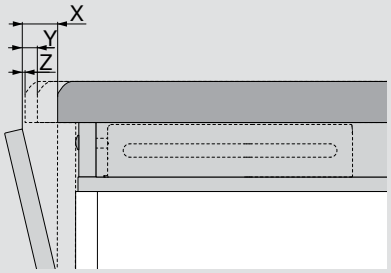


Planung Antriebseinheit





Zugriff bei Arbeitsplatten-Überstand



X	30 mm	APÜ	0 mm
Y	10 mm	APÜ	20 mm
Z	0 mm	APÜ	30 mm

NH	Nischenhöhe
BS	Blendenstärke
SWD	Seitenwanddicke

APL-UK	Arbeitsplatten-Unterkante
APÜ	Arbeitsplatten-Überstand

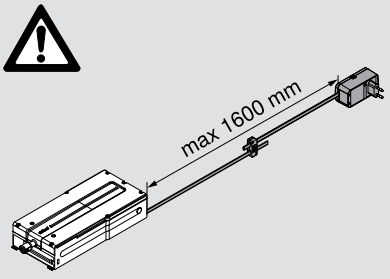
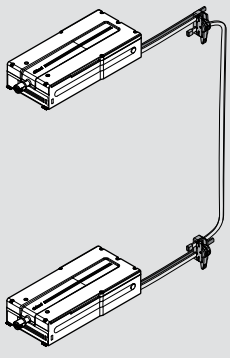
Verkabelung / Hinweise



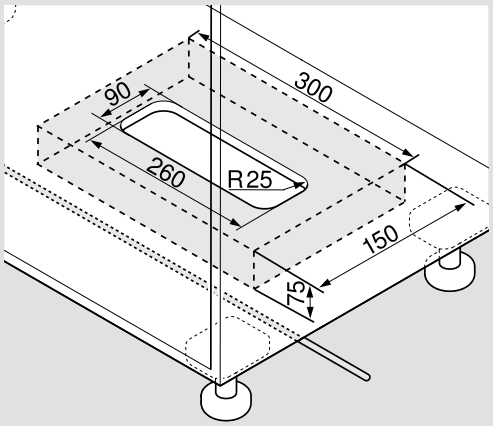


Schwarz = Spannungsversorgung
Lichtgrau R7035 = Kommunikation
(Synchronisierungskabel)

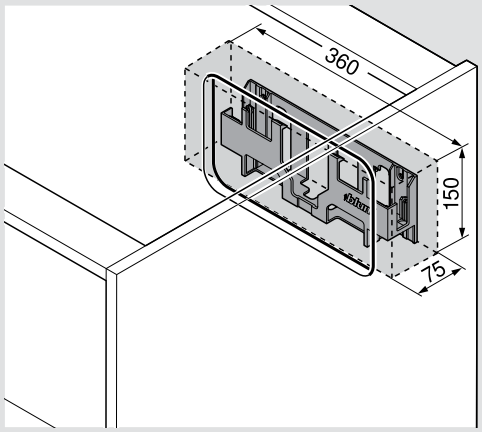
SERVO-DRIVE flex

Montage Netzgerät

Platzbedarf + Sicherheitsabstand Netzgeräthalterung



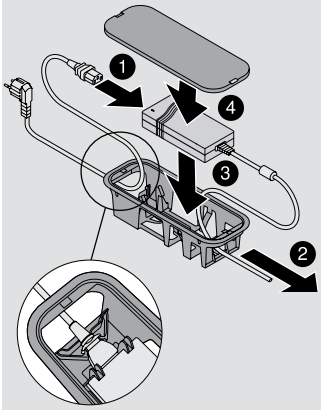
Bodenmontage

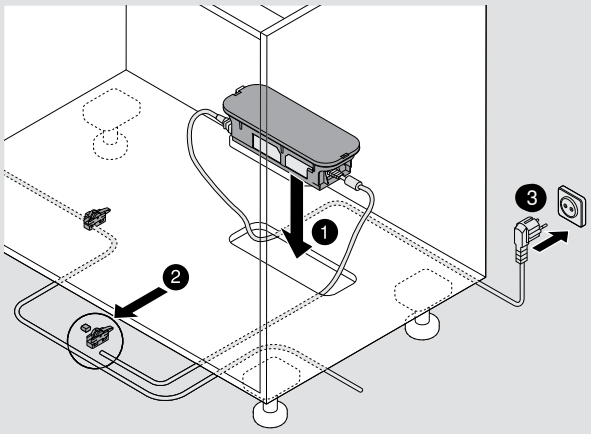


Wandmontage

Hinweis:
30 mm Sicherheitsabstand von der Unterkante (Bodenmontage) bzw. der Vorderkante (Wandmontage) und den Seitenrändern des Netzgeräthalters zu benachbarten Elementen einhalten sowie Luftzirkulation ermöglichen, sonst droht Überhitzung des Blum-Netzgerätes.

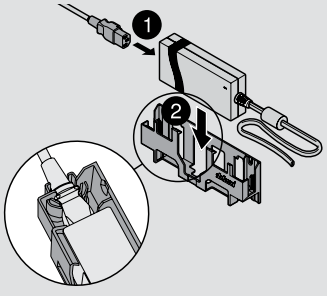
Netzgeräthalterung – Bodenmontage

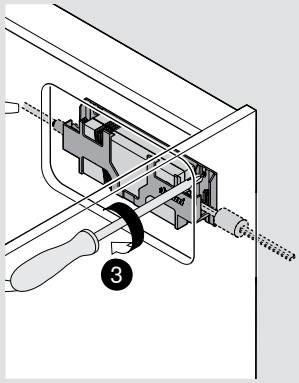


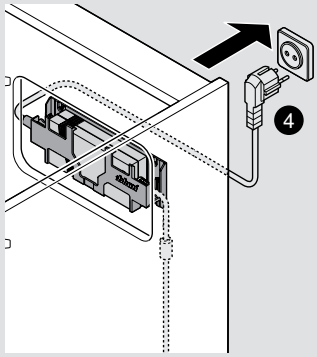


Aushängesicherung

Netzgeräthalterung – Wandmontage

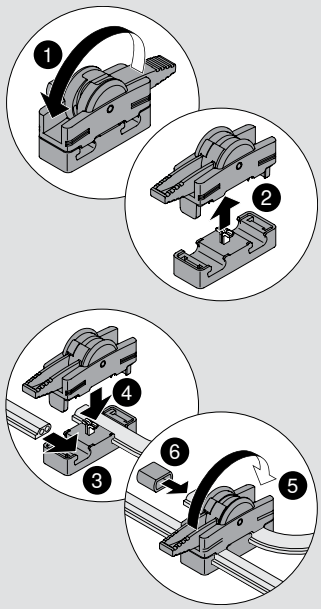


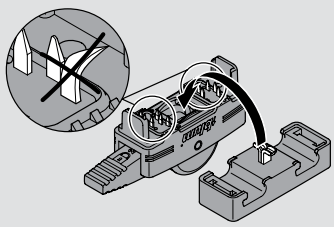




Aushängesicherung

Montage Verbindungsknoten





Piercingspitzen nicht beschädigen!
